

GENEUARY

January 2021 - Jewish Genetics Awareness Month

1

GENEUary is a month-long awareness campaign designed to raise awareness of recessive Jewish genetic disorders (JGDs) and how they can be prevented

2

1 in 5 people with Ashkenazi origin will be a healthy carrier of a severe recessive JGD

3

Carrier screening identifies those at risk of passing on a JGD to their future children, giving them the knowledge needed to avoid the tragedy of having an affected child

4

Jnetics offers subsidised screening, in partnership with the NHS, via The Jnetics Clinic.
